

Publications of W. D. McKee

- [1] W. D. McKee, A note on the sea level oscillation in the neighbourhood of the Drake Passage, *Deep-Sea Res.*, **18** (1971), 547–549.
- [2] W. D. McKee, Comments on "A Rossby wake due to an island in an eastward current", *J. Phys. Oceanog.*, **1** (1971), 287.
- [3] W. D. McKee, Scattering of Rossby waves by partial barriers, *Geophys. Fluid Dynam.*, **4** (1972), 83–89.
- [4] W. J. Gould, W. D. McKee, Vertical structure of semi-diurnal tidal currents in the Bay of Biscay, *Nature*, **244** (1973), 88–91.
- [5] L. Magaard, W. D. McKee, Semi-diurnal tidal currents at "Site D", *Deep-Sea Res.*, **20** (1973), 997–1009.
- [6] W. D. McKee, Internal-inertia waves in a fluid of variable depth, *Proc. Camb. Phil. Soc.*, **73** (1973), 205–213.
- [7] W. D. McKee, The wind-driven equatorial circulation in an homogeneous ocean, *Deep-Sea Res.*, **20** (1973), 889–899.
- [8] W. D. McKee, Waves on a shearing current: a uniformly valid asymptotic solution, *Proc. Camb. Phil. Soc.*, **74** (1974), 295–301.
- [9] W. D. McKee, A two turning-point problem in fluid mechanics, *Math. Proc. Camb. Phil. Soc.*, **77** (1975), 581–590.
- [10] W. D. McKee, Continental shelf waves in the presence of a sheared geostrophic current, *Lecture Notes in Physics*, **64** (1977), 212–219.
- [11] W. D. McKee, The reflection of water waves by a shear current, *Pure Appl. Geophys.*, **115** (1978), 937–949.
- [12] W. D. McKee, Critical levels for forced Rossby and continental shelf waves, *Pure Appl. Geophys.*, **117** (1979), 841–850.
- [13] G. W. Jackson, W. D. McKee, Similarities between long water waves and electromagnetic waves, *Journal of Hydraulic Research*, **22** (1984), 1–8.
- [14] P. J. Kachoyan, W. D. McKee, Wave forces on steeply-sloping sea walls, *Journal of Engineering Mathematics*, **19** (1985), 351–362.
- [15] W. D. McKee, Reflection of water waves from an exponentially sheared current, *IMA J. of Applied Math.*, **37** (1986), 77–90.
- [16] W. D. McKee, Water wave propagation across a shearing current, *Wave Motion*, **9** (1987), 209–215.
- [17] W. D. McKee, Wave forces on steeply-sloping sea walls: oblique incidence, *J. Eng. Math.*, **21** (1987), 87–99.
- [18] W. D. McKee, F. Tesoriero, Reflection of water waves from a vertical vortex sheet in water of finite depth, *J. Austral. Math. Soc. Ser. B.*, **29** (1987), 127–141.
- [19] W. D. McKee, Calculation of evanescent wave modes, *J. Waterway, Port, Coastal and Ocean Engrg. ASCE*, **114** (1988), 373–378.
- [20] J. D. Fenton, W. D. McKee, On calculating the lengths of water waves, *Coastal Engineering*, **14** (1990), 499–513.
- [21] W. D. McKee, Bragg effects in a corrugated circular duct, *Acustica*, **80** (1994), 558–562.
- [22] W. D. McKee, Reflection of water waves by a weak rapidly varying shearing current., *Wave Motion*, **20** (1994), 143–149.

- [23] W. D. McKee, Bragg resonances in a two-layer fluid, *J. Austral. Math. Soc. Ser. B*, **37** (1996), 334–345.
- [24] W. D. McKee, Models for water wave propagation across a shearing current, *J. Phys. Oceanog.*, **26** (1996), 276–278.
- [25] W.D. McKee, The propagation of water waves along a channel of variable width, *Applied Ocean Research*, **21** (1999), 145–156.
- [26] R. D. Ghisolfi, W. D. McKee, The effects of the alongshore wind stress on the top-to-bottom front along the Southern Brazilian coast: a two-dimensional modelling approach, *Continental Shelf Research*, **23** (2003), 1401–1424.
- [27] M. D. Hirschhorn, W. D. McKee, On the evaluation of certain improper integrals arising in waveguide theory, *Austral. Math. Soc. Gazette*, **30** (2003), 31–34.
- [28] W. D. McKee, The propagation of water waves across a laterally sheared current, *Applied Ocean Research*, **28** (2007), 339–344.
